ABB Type Designation	-
Catalog Description	ODBC Client Connection

Additional Information

Technical Information	Open Database Connection (ODBC) client which is needed for applications e.g. Batch Report that utilize commercial third party reporting tools. The number of client connections required is based on whether the applications utilize the connection directly or indirectly. If the connection is made indirectly (using Oracle), then the client connection requires only one. If the client connections are direct, then the number of clients should equal the number of concurrent users. ODBC Clients are purchased separately from the ODBC server (max 10 per ODBC server).
